## FDA Food Contact Compliance Statement:

# Bulk Bag Loader

*NOTE: This statement is made on the information provided to us by the material supplier and corresponds with our actual knowledge. BFM® fitting uses the ether-based polyurethane material to manufacture our Bulk Bag Loader connectors, however, we cannot guarantee the suitability of the material for any given application and assume no liability in connection with the information provided below.*

The Bulk Bag Loader is a three-layered, inflatable filling head featuring a stainless steel core fully encased in Seeflex ether-based polyurethane and meets the requirements to comply with the applicable requirements of the pertinent sections of the Code of Federal Regulations (CFR) of the US Food and Drug Administration (FDA) as described below:

Section No:	Section Title:
FDA 21 CFR 177.1680	Polyurethane resins used as articles or components of articles intended to contact food.
FDA 21 CFR 177.2600	Rubber articles used as articles or components of articles intended to contact food.

This applies to all dry food and powder product.

If you need further information on the safety of our products, please contact us.
